
Hayden Austin

Software Engineer | Full-Stack Development

haydaust@gmail.com | github.com/xSolumx

Full-stack developer building React and TypeScript business applications with Firebase backend services. Work spans product administration, staff access, enquiry handling and reporting, with automated tests and release verification.

SELECTED APPLICATION DEVELOPMENT

Product management & enquiry platform | [Live application](#)

- Built TypeScript spreadsheet import/export and validation tools for product records, alongside catalogue publishing and administration workflows.
- Implemented Firebase Auth staff provisioning, custom role claims and backend checks separating staff administration from content management.
- Built validated, rate-limited enquiry intake with Firestore persistence and attribution; added compressed image uploads and WebP thumbnails.
- Implemented server-rendered routes and data prefetching, with tests for server/client hydration and spreadsheet import guards.

Equipment catalogue & reporting platform | [Live application](#)

- Built a React/Firebase catalogue with admin, quote requests and server-side rendering.
- Implemented consent-gated analytics with event batching, retry handling and scheduled Firestore aggregation for reporting.
- Added automated access-rule tests covering unauthorised writes and privilege escalation, plus checks for analytics data contracts.
- Built GitHub Actions release gates with SHA-256 manifests and immutable-asset checks.

EXPERIENCE

Freelance Developer

2023 - 2025

- Developed web applications for commerce and professional services, covering product catalogues, authentication, content management and deployment.

Game Server Developer & Administrator

2019 - 2022

- Built event-driven Java plugins with persistent item metadata and server API integrations; maintained Linux servers and investigated performance issues.

TECHNICAL SKILLS

Frontend: TypeScript, JavaScript, React, Next.js, Vite, server-side rendering

Backend & data: Node.js, Firebase Auth, Firestore, Cloud Functions, SQL

Testing: Jest, React Testing Library, Firebase rules testing, integration tests

Delivery: Git, GitHub Actions, Linux, release verification, asset integrity checks

EDUCATION

Belgium Campus ITversity

Studies toward a Bachelor of Computing, specialising in Software Engineering.
