Software Developer | C# & .NET

haydaust@gmail.com | github.com/xSolumx

Software developer with C#/.NET Framework projects in WinForms, WPF and SQL Server, alongside freelance web-application experience. Work covers data access, event-driven interfaces, backend validation and automated checks.

SELECTED APPLICATION DEVELOPMENT

Student & module management (coursework) | [Code](#)

- Built a C# WinForms application for creating, searching, updating and deleting student and module records in SQL Server.
- Implemented ADO.NET data access using DataTable, SqlDataAdapter and parameterised stored-procedure calls for form-driven CRUD workflows.

Windows maintenance interface (prototype) | [Code](#)

- Prototyped a C# WPF interface for running DISM and SFC, capturing external-process output and updating controls through the UI dispatcher.
- Used async/await and process event handlers to connect command execution with application status and log output.

Business administration applications | [Catalogue](#) / [Products](#)

- Developed React/TypeScript and Firebase applications for product publishing, staff access and enquiry handling.
- Added automated access-rule and release checks, including tests for unauthorised writes and privilege escalation.

EXPERIENCE

Freelance Developer

2023 - 2025

- Developed web applications for commerce and professional services, covering product catalogues, authentication, content management and deployment.

Game Server Developer & Administrator

2019 - 2022

- Built event-driven Java plugins with persistent item metadata and server API integrations; maintained Linux servers and investigated performance issues.
